

How to Measure-Clothing

MTO Dress

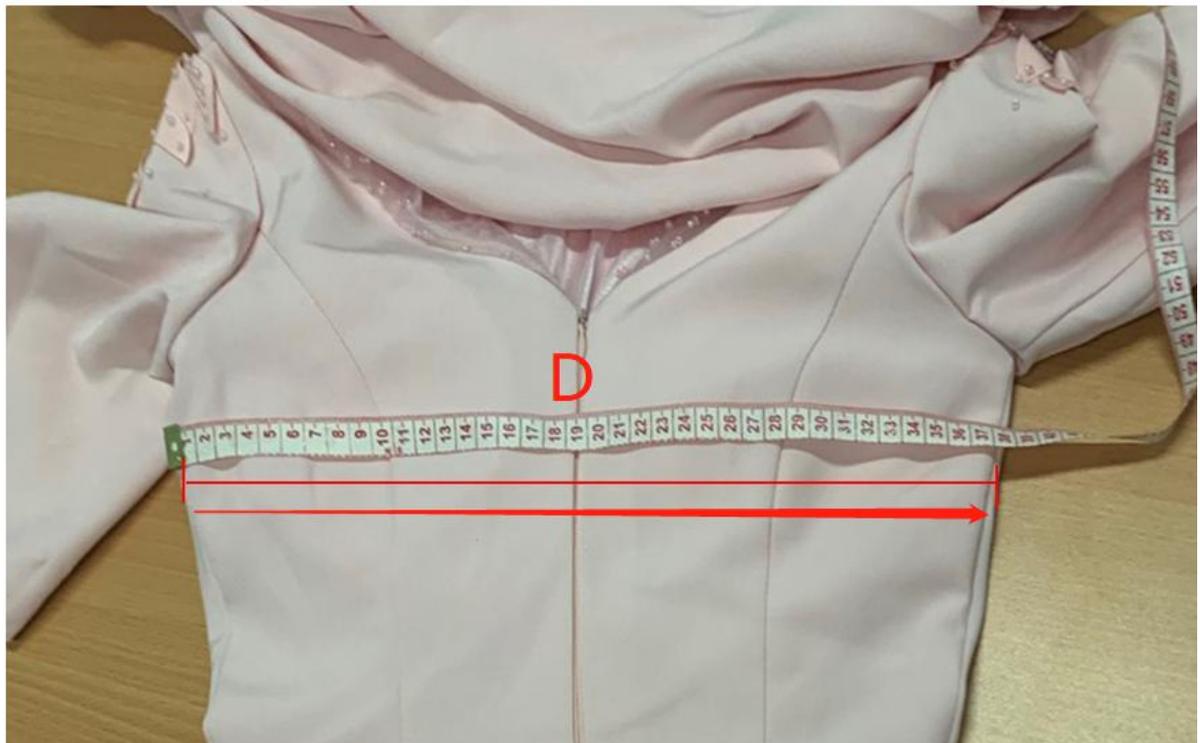

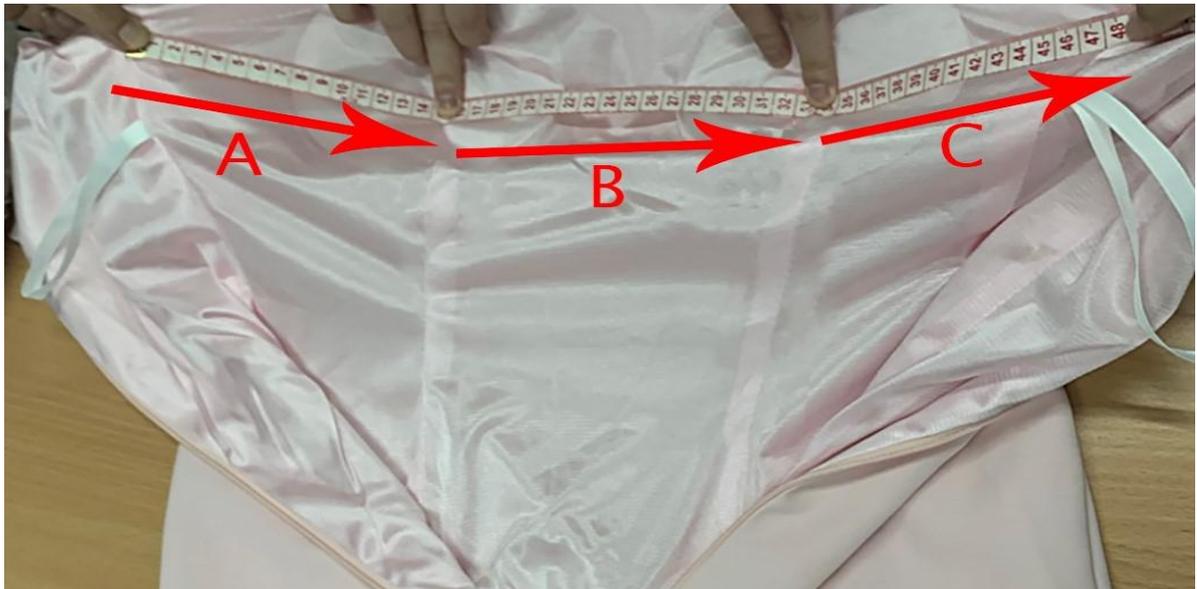

- 1、 **Skirt length:** the length from the shoulder line to bottom hem

2、 **Bust** = front bust + back bust (A+B+C+D)

Front bust: the length from the left side of the armpit to the center of the left Bra + the length between the 2 bra center points + the length from the right of the right Bra center to the right side of the armpit

Back bust: The length taken from side seam to side seam directly under the armhole

3、 **Waist Measurement:** Measure the length horizontally on the smallest part of the waist *2

4. **Hip circumference:** Measure the length horizontally on the widest part on the hip line *2

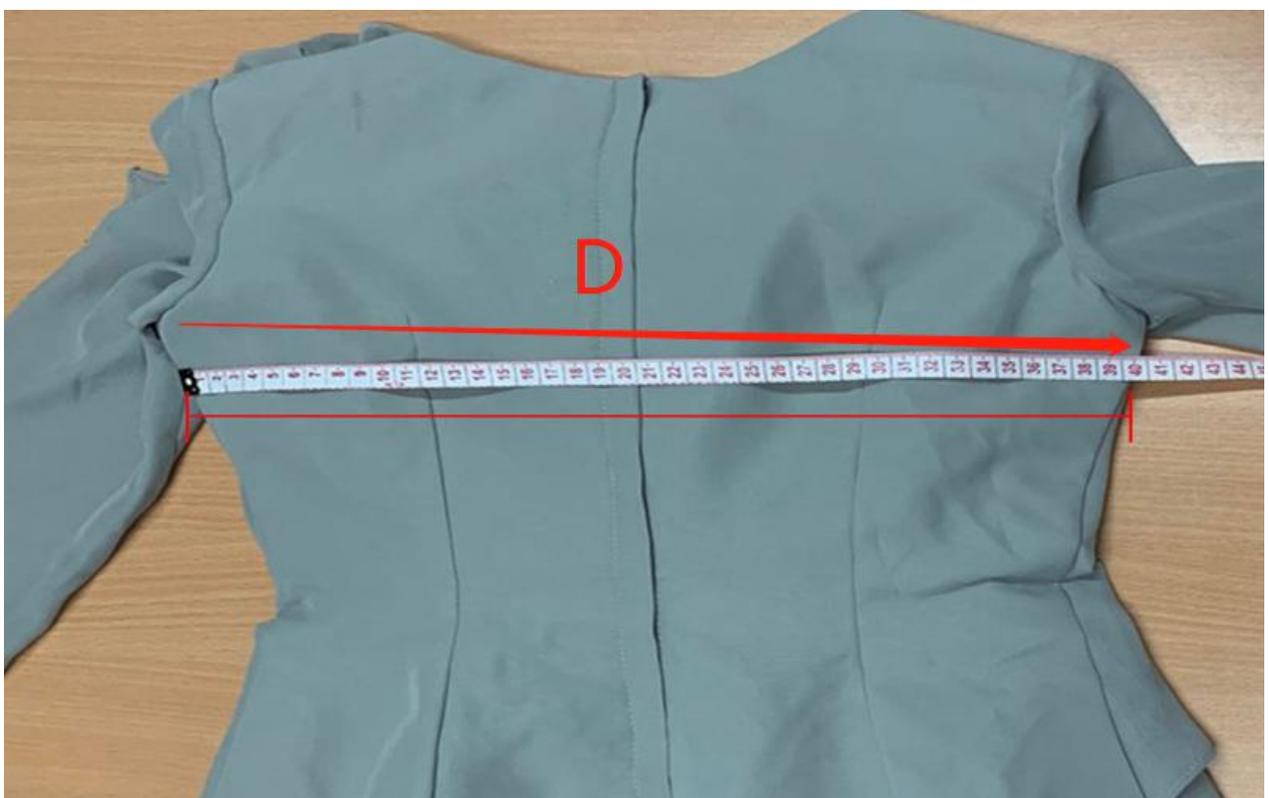

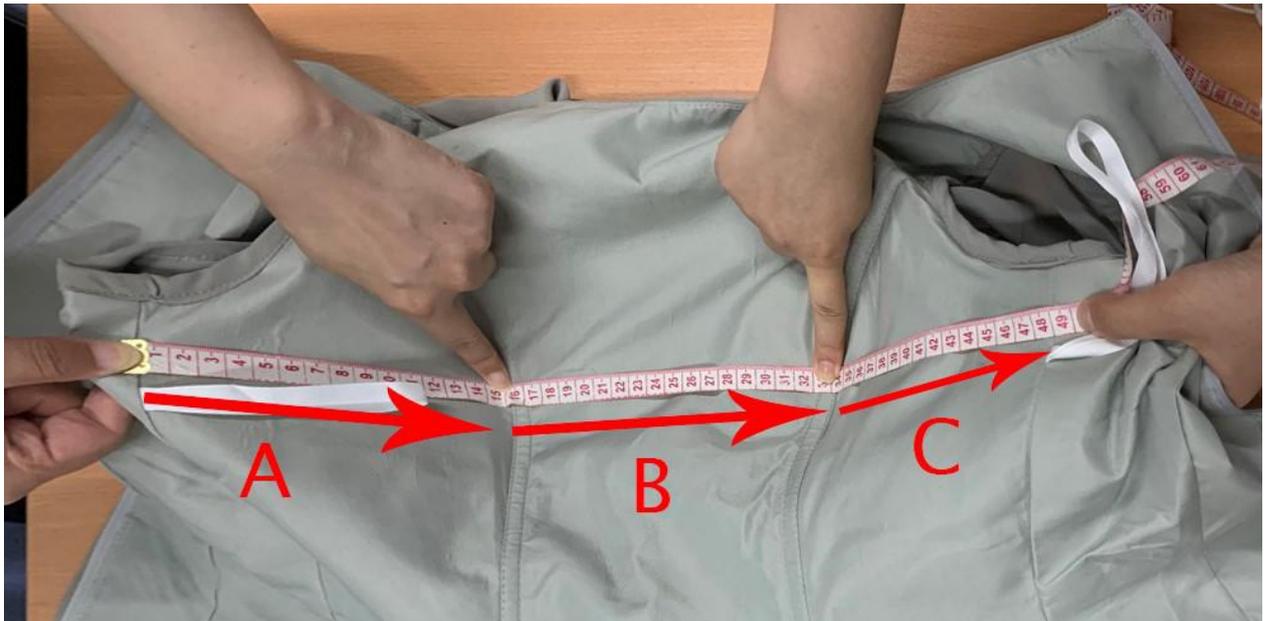

Pants suit

1. Top bust = front bust + Upper back

Front bust: the length from the left side of the armpit to the center of the left Bra + the length between the 2 bra center points + the length from the right of the right Bra center to the right side of the armpit

Back bust: The length taken from side seam to side seam directly under the armhole

2、 Length: the distance from the shoulder line to the waist

3. **Normal waist:** Horizontally measure the length for waistband from end to end and multiply this number by two.

Stretch waist circumference: Stretch the elastic band as far as it can go, measure the length for waistband from end to end and multiply this number by two.

4、 **Hip circumference:** Measure the length horizontally at the widest part of the buttocks*2

5、 **Pants length**: the distance from waist to bottom hem
